

Guardian Analytics

ONLINE RETAIL

Key Features

- Analyze all online banking activities from login to logout
- Detect anomalous behavior based on device, geo-location, time, activities, transaction details, and many other factors
- Prioritized alerts based on risk score
- Rich session-specific context and account history
- Streamlined investigations with easy-to-use interface

Key Benefits

- **Reduce fraud losses and risk** by detecting the widest array of current and emerging fraud threats
- **Improve operational efficiency and team productivity** by providing prioritized alerts and rich context for unusual activity
- **Enhance compliance** by conforming to FFIEC guidance that recommends anomaly detection as part of your layered security strategy
- **Enhance brand reputation and customer trust** by proactively protecting online assets
- **Improve competitiveness** by expanding online offerings and service levels while mitigating associated risks

Guardian Analytics Online Retail is the only solution that provides comprehensive behavior analytics fraud prevention for online banking. Guardian Analytics provides turnkey integrations with all major online banking platforms and offers seamless and rapid deployment.

Proven Fraud Prevention for Online Retail Banking

With the most precise alerts, fraud analysts can focus on the highest risk sessions, reducing tedious manual reviews and unnecessary customer callbacks. Holistic view of online banking activities with session-specific context enables fraud analysts to effectively and efficiently identify account compromise and prevent unauthorized bill pay, P2P payment, and other online payment requests across all retail accounts.

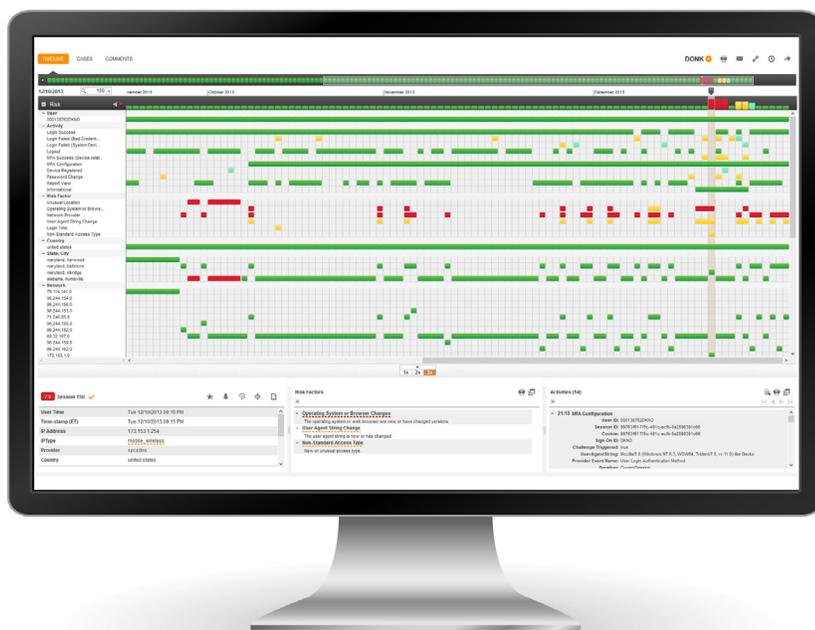

User-defined Policies

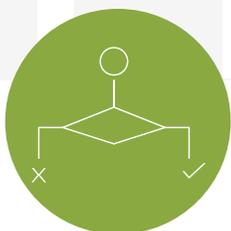

Monitor search with user-defined rules provides additional layer of fraud detection. It can drive automated in-session intervention.

Training and Certification

Guardian Analytics offers a comprehensive training and certification program designed to enable new and experienced customers to get the most out of the Guardian Analytics platform. The curriculum includes a self-paced certification program and instructor led courses for advanced users.

Focus on biggest risk areas across channels

Make faster and better fraud risk decisions

Build trust through more productive customer conversations

Enhance services and offerings based on customer behavior

“Guardian Analytics Online allows us to transparently monitor every online banking user and session for unusual activity and anomalous transitions. It automatically protects all our retail and business banking account holders, from login to logout.”

“Guardian Analytics Online have accurately identified all the online banking fraud we have seen.”
